1. Help Schools Know About Danger Around Them

- Schools can receive distress and security alerts about what is happening around their area.
- This helps the school prepare the children for evacuation, protection or staying away from dangerous places.

2. Help Police Respond Faster

- The exact location of the school will be seen on the map.
- This helps the Police know where the school is and respond faster during an emergency.

3. Send Security Reports to the Correct School

- Residents, parents, security personnel and people passing through the community can send reports directly to the school.
- Reports may include: Drug and alcohol activities, students loitering during school hours, suspicious people or movement, and other security threats around the school.

4. Report Bad or Criminal Security Guards

- A school can report a security guard suspected of crime or criminal plans.
- The Police can investigate and take necessary action.
- The information can also help stop the person from getting another security job in another school.

5. Allow School Staff to Report Dangerous Guards Around Their Homes

- Teachers and other school staff can also report suspicious or criminally minded security guards in their estate, street or community.

WHY THIS MATTERS

- Danger can start from both the school and the community.

- Early reporting helps protect children, staff and other schools.

- Police and schools can act before problems grow.

6. Receive Reports About School Drivers

- Parents and members of the public can report the behaviour of a school driver.
- This can include dangerous driving, bad behaviour, threats or other safety concerns.

7. Warn Schools About Fleeing Guards or Suspected Criminals

- Schools can receive the picture, name and details of a fleeing security guard or suspected criminal.
- This helps other schools recognise the person and avoid employing someone who may be a security risk.
